PROFESSIONAL SUMMARY

I am a final-year Electronics and Communication Engineering student passionate about software development and building efficient, scalable applications. I have hands-on experience in Java, Spring Boot, MySQL, and Hibernate, and a proven track record of creating secure, high-performance systems. With a strong focus on problem-solving and collaboration, I enjoy working on projects that deliver real-world impact and value. I thrive in team environments and am committed to delivering robust, well-tested solutions.

EDUCATION

Nitte Meenakshi Institute of Technology

Bachelor of Engineering in Electronics and Communication Engineering

Bengaluru, India

Dec. 2021 – Present

Aklank Public School

Kota, Rajasthan

Class 12th

M.K.D.A.V Public School

May 2020 – May 2021

Class 10th

May 2018 – May 2019

PROJECTS

Job Portal | *Technologies: Spring, Spring Boot, Thymeleaf, MySQL, Hibernate*

- Developed a full-stack web application enabling hiring managers to post job openings and candidates to apply seamlessly.
- Implemented secure authentication and role-based authorization using Spring Security, ensuring robust access control for admins and candidates.
- Optimized database interactions with Hibernate, reducing query latency by 20%.
- Conducted comprehensive API testing using Postman, ensuring reliability, and wrote unit tests with JUnit to maintain code quality throughout the development lifecycle.
- Followed the Iterative Model of SDLC, facilitating iterative development cycles to minimize bugs and incorporate user feedback effectively.

College Management System | *Technologies: Spring Boot, MySQL, Spring Security, Postman, Hibernate*

- Developed a backend system with REST APIs to manage roles for students, professors, and admins.
- Secured endpoints using Spring Security, implementing authentication and role-based access.
- Designed and implemented a many-to-many relationship between courses and users to enable enrollment functionality and role-based access management.
- Conducted API integration testing with Postman.
- Improved system performance through query optimization and caching strategies.

Flight Reservation System | *Technologies: Java, JDBC, MySQL*

- Designed and implemented a comprehensive database schema and user-friendly interface for managing flight bookings, customer information, and schedules using Java, JDBC, and MySQL.
- Developed and tested backend functionality to handle CRUD operations, ensuring robust data validation, secure authentication, and efficient performance optimization.
- Provided comprehensive documentation and user manuals to facilitate easy maintenance and user training, enhancing system reliability and usability.

TECHNICAL SKILLS

Programming Languages: Java(Core and Advanced)

Testing Tools: Postman, JUnit, Selenium

Core Skills: Operating Systems, Computer Networking, DBMS, Data Structures and Algorithm, SDLC, OOPS, Linux

Frameworks: Hibernate, Spring Boot, Thymeleaf, Scrum

Databases: MySQL

Developer Tools: IntelliJ IDEA, MySQL Workbench

NON TECHNICAL SKILLS

Leadership: Co-Head of Theater Club (GOONJ)

Team Collaboration: NMIT Cricket Team

Hobbies: Cooking, Sports
