

Spektra Internship Program

About Spektra Systems

Spektra Systems is a cloud solutions company. Spektra's products and services around cloud platforms help organizations of all sizes to accelerate their digital transformation journey. Our Products includes CSP Control Center (cspcontrolcenter.com), Cloud Labs (CloudLabs.ai), SaaSify (SaaSify.AI), & Cloud Events (cloudevents.ai).

Headquartered in Seattle, Spektra has offices in India & Mexico.

Website: <https://spektrasystems.com>

About this program

This is our annual internship and enablement program for last semester students aiming to start career in cloud technologies. Every year, we hire interns and train them on Microsoft Azure and other cloud platforms including AWS & GCP.

Upon completion, Interns are provided opportunity to participate in interviews for a permanent position at Spektra Systems. Performance during internship is a key criterion for selection.

Schedule:

- **Internship Period:** 3 months. Start date of internship will be Feb/March 2025.
- **Duration:** 8 Hours daily, 5 days a week. (40 Work hours every week)
- **Location:** Bangalore

Eligibility:

You should be curious to learn, along with complying following eligibility requirements.

- Students in engineering education (B.Tech/MTech/BCA/BSc/MCA similar) courses who are in their last semester. You must be completing your education by July 2025.
- Must be from Computer engineering/IT related branches Only.
- You must be willing to commit for 40 work Hours a week for the specified duration.
- You must have your own laptop and a solid internet connection.
- You should not have any active exam backlog.
- You are looking at starting your IT career in June-July 2025 time frame. Students planning for higher studies are not eligible as the program is designed to prepare students for employment right after internship.

What will you be learning:

Depending on your internship application, interviews, and current skillset, you'd be assigned to one of the below groups.

- Software Development Engineer Path ○ Includes training on Microsoft Azure Fundamentals, C#, AngularJS & SQL, Salesforce.
- Cloud Engineer Path ○ You will get to learn one of the cloud platforms (Microsoft Azure/AWS/GCP) in deep including Cloud Infrastructure, Automation using Scripting and deployment templates such as ARM and Cloud Formation.

Once you start, you'll be provided monthly plan which includes.

- Classroom training where you will be trained by a well-versed Coach in the subject
- Assessments & Presentations
- Hands-on Access to Cloud Subscriptions
- Opportunity to work on real production projects with Spektra Systems.

How much will it cost?

Zero.

Spektra Systems is not a training company and do not charge interns for any training cost. Instead, once an intern starts contributing to real production projects, the company may pay a stipend per month, with a maximum of INR 10,000 per month.

Please note that stipend is only paid once an intern is active in production and is contributing towards real projects on daily basis. This typically happens after completing 2 months of internship and is based on your performance during internship, performance on production projects and results of assessments through the period.

Why Intern with Spektra

Because:

1. Unique program designed for train students to start their career in Cloud technologies.
2. Access to mentors/trainers with years of expertise.
3. Real world projects and training on top Cloud platforms and programming languages.
4. Access to Commercial cloud subscriptions (typically with a limit of 10K INR Cloud spend per month).
5. Opportunity to appear for Microsoft Azure Certifications.
6. Opportunity for a full-time employment with Spektra systems.

What after Internship?

Our goal for internship is to train students and offer employment with Spektra Systems, however both parties (Intern and Spektra) can terminate the internship contract at any point with 10 days' notice or at the end of stipulated period.

At the end of internship, full time employment opportunities are provided for interns based on their performance during the internship along with any other assessment/interviews as conducted.

CTC – 3.6L to 5L PA will be offered based on performance and skills match as observed during the 3 months Internship program.

Other benefits include,

- INR 750/- as Internet reimbursement
- Medical Insurance up to 3L
- Provident Fund
- Shift allowances – INR 500 per Night. 250 per Early Morning (role specific)

Typically, we hire interns as FTE across various role depending on skills and career path. It may be one of the following positions. You can also refer to your careers page to view current open positions: [Jobs at Spektra Systems](#) : careers@spektrasystems.com

Work Experience: Freshers

Work Timings: Rotational Shift

We are seeking a dedicated and customer focused L1 Support specialist Intern to join our support team. The ideal candidate will be the first point of contact for users experiencing any L1 issues. You will be responsible for diagnosing and resolving basic problems, providing timely and effective support, and escalating more complex issues to higher-level support as necessary.

Key Responsibilities:

SLA Management:

- Respond to incoming support requests via email, or ticketing system, ensuring all incidents are logged and tracked appropriately.
- Follow the SLA Process and Diagnose and resolve basic issues, providing step-by-step assistance to users.
- Escalate unresolved issues to L2/L3 support teams with detailed documentation and troubleshooting steps already taken.

Customer Service:

- Maintain a high level of customer satisfaction by providing clear communication, regular updates, and timely resolutions.
- Assist in the setup, configuration, and deployment of hardware and software for new and existing employees.
- Regularly monitor system performance and alerts and take preventive measures to avoid potential issues.
- Ensure compliance with company policies, procedures, and security protocols at all times.

Qualifications:

- Basic understanding of computer hardware, software, Familiarity with common operating systems (Windows, Mac OS, Linux).
- Excellent verbal and written communication skills, with the ability to explain technical concepts to non-technical users.
- Strong analytical and problem-solving skills with a keen attention to detail.
- A strong commitment to providing exceptional customer service and a positive user experience.
- Ability to work effectively both independently and as part of a team.
- Willingness to work in shifts, including nights, weekends, and holidays, as required.

Mode of Training/Internships:

Training during the internship period will be offline in **Bangalore**.

Full Time Employment - Spektra is currently offering remote work opportunity, however soon company may start working from office. Location – Bangalore and Hyderabad. Spektra will provide

licensed Teams account for everyone and it shall remain the primary collaboration platform while we work remotely.

Typically, training/internship includes,

1. In person dedicated mentor/trainer
2. Live & Recorded Trainings
3. Hands-on Labs
4. Technical Challenges/Hackathons
5. Real Production Projects

How to Apply:

Contact your college placement officer if campus selection and/or Spektra contacts as applicable.

Selection Process.

Selection for internship will be based on:

1. Online/Offline assessments/coding challenges.
2. GD, as applicable
3. Personal Interview round
4. Through check on academic background to ensure zero backlogs.

Typically, you would be notified with results within a week of your first interview.

FAQ

1. Do we need to pay anything for the internship?
A: No, you do not need to pay anything, instead you may be eligible for stipend based on guidelines defined above.
2. What will we be trained on?
A: Depending on your internship career path, you will be assigned to one of the batches. Please refer to internship path and link to job descriptions shared above.
3. Is a job guaranteed at Spektra Systems after internship?
A: No, but you will be provided opportunity to apply for the permanent positions based on your performance during internship.
4. I plan to go for higher studies, Can I still do internship?

A: Spektra Academy Graduate internship program is designed for students looking for starting their career after graduation in cloud computing industry. We do not accept students for internship who do not plan to start working after graduation.

5. When will I get stipend?

A: Stipend is an optional perk of internship to reward students who are contributing towards active production projects. Based on your internship performance during initial period, you may be given this opportunity. There is no guaranteed stipend attached to the internship.

6. How many leaves can I take during internship? What if I have exams?

A: Leaves on those days of exams will be approved considering the same has been informed to the mentor and the HR well in advance. Unplanned leaves will have serious negative impact.

7. What if I have any questions?

A: campus@spektrasystems.com. Please allow 2 to 3 days to get back on this email.

All the best!
