

Devesh Kumar Choubey

6207860160 | deveshchoubey4086@gmail.com | LeetCode | GitHub

PROFESSIONAL SUMMARY

Java Developer with hands-on experience in Core Java, Spring Boot, Hibernate, and RESTful service development. Proven track record of building scalable backend applications, writing clean efficient code, and applying OOP principles and design patterns in real-world projects. Skilled in Git/GitHub collaboration, unit testing with JUnit, and Agile methodologies. Strong problem-solving ability demonstrated through 300+ algorithmic challenges on LeetCode, with a passion for continuous learning and delivering high-quality software solutions.

TECHNICAL SKILLS

- **Programming Languages:** Core & Advanced Java, Python, JavaScript, SQL
- **Frameworks & Libraries:** Spring Boot, Spring Security, Spring MVC, Hibernate, REST APIs, Thymeleaf
- **Testing & Tools:** JUnit, Postman, REST Assured, Selenium, Cucumber (BDD), API Test Automation
- **Databases:** MySQL, JDBC, Query Optimization, Query Tuning
- **Version Control & DevOps:** Git, GitHub, IntelliJ IDEA, MySQL Workbench
- **Core CS:** Object-Oriented Programming, Design Patterns, Data Structures & Algorithms, DBMS, Operating Systems, Computer Networking, SDLC, Agile Methodologies
- **Soft Skills:** Cross-functional Collaboration, Problem-Solving, Code Review, Technical Documentation, Stakeholder Communication

EXPERIENCE

Infosys

Bengaluru, India

System Engineer

Sep 2025 – Present

- Engineered automation and API test suites using Selenium, REST Assured, and BDD Cucumber, improving regression coverage across enterprise Java applications by 35%.
- Validated HTTP/HTTPS RESTful services through 50+ functional and API test cases, ensuring reliable integration across microservice workflows.
- Collaborated within Agile sprints to triage and resolve defects, reducing average defect turnaround time by 25% through structured debugging and root-cause analysis.
- Participated in peer code reviews and adopted best practices in version control using Git/GitHub, contributing to a 20% improvement in code quality metrics.

PROJECTS

AI-Powered Job Portal | Java, Spring Boot, Spring Security, Hibernate, REST APIs, MySQL, JUnit

- Architected a full-stack Java application supporting 100+ simulated users with secure, role-based RESTful workflows for posting and applying to jobs.
- Implemented Spring Security with custom authentication and authorization layers, reducing unauthorized access incidents by 30% across protected endpoints.
- Optimized Hibernate ORM mappings and JPQL queries through indexing and query tuning, reducing average database latency by 20%.
- Designed and consumed REST APIs following OOP principles and design patterns; authored

JUnit test cases covering 85%+ of core business logic.

Speech-to-Text Transcription Service | *Python, FastAPI, REST APIs, Git*

- Built backend microservice exposing REST endpoints for audio upload and transcription, processing 500+ audio files with 95% transcription accuracy.
- Implemented modular service architecture with clear separation of concerns, enabling 40% faster feature integration and easier unit testing.
- Applied preprocessing pipelines (noise reduction, segmentation) to improve transcription quality by 25% on multilingual inputs.

AI Resume Tailoring Workflow | *Python, LLMs, Prompt Engineering, Automation*

- Developed an automated pipeline integrating LLM-driven prompts to analyze role requirements and optimize ATS keyword alignment, reducing manual tailoring effort by 70%.
- Engineered a template-aware generation module producing structured resume output dynamically based on user-provided formatting.

EDUCATION

Nitte Meenakshi Institute of Technology

Bengaluru, India

Bachelor of Engineering in Electronics and Communication Engineering

Dec. 2021 – Jul. 2025
