PROFESSIONAL SUMMARY

Final-year Electronics and Communication Engineering student with expertise in Java, Spring Boot, MySQL, and Hibernate. Experienced in developing secure, scalable, and efficient applications with a focus on backend development. Demonstrated problem-solving abilities by solving 300+ algorithmic problems on LeetCode. Strong knowledge of data structures, algorithms, and software development life cycles (SDLC). Committed to delivering high-quality solutions through robust testing and optimization.

EDUCATION

Nitte Meenakshi Institute of Technology

Bachelor of Engineering in Electronics and Communication Engineering

Bengaluru, India

Dec. 2021 – Present

Aklank Public School

Class 12th

Kota, Rajasthan

M.K.D.A.V Public School

Class 10th

May 2020 – May 2021

Medininagar, Jharkhand

May 2018 – May 2019

PROJECTS

Job Portal | *Technologies: Spring, Spring Boot, Thymeleaf, MySQL, Hibernate*

- Developed a full-stack web application enabling hiring managers to post jobs and candidates to apply seamlessly.
- Implemented Spring Security to secure user authentication, reducing unauthorized access incidents by 30%.
- Optimized database interactions with Hibernate, reducing query latency by 20%.
- Conducted over 30 API tests using Postman to guarantee robust functionality.

College Management System | *Technologies: Spring Boot, MySQL, Spring Security, Postman, Hibernate*

- Developed a backend system with REST APIs to manage roles for students, professors, and admins.
- Secured endpoints using Spring Security, implementing authentication and role-based access.
- Designed and implemented a many-to-many relationship between courses and users to enable enrollment functionality and role-based access management.
- Conducted API integration testing with Postman.
- Improved system performance by optimizing queries, resulting in a 25% faster response time for database operations.

Flight Reservation System | *Technologies: Java, JDBC, MySQL*

- Designed and implemented a comprehensive database schema and user-friendly interface for managing flight bookings, customer information, and schedules using Java, JDBC, and MySQL.
- Developed and tested backend functionality to handle CRUD operations, ensuring robust data validation, secure authentication, and efficient performance optimization.
- Provided comprehensive documentation and user manuals to facilitate easy maintenance and user training, enhancing system reliability and usability.

TECHNICAL SKILLS

Programming Languages: Java(Core and Advanced)

Testing Tools: Postman

Core Skills: Data Structures and Algorithms (200+ problems solved on LeetCode), Operating Systems, Computer Networking, DBMS, SDLC, OOPS

Frameworks: Hibernate, Spring Boot, Thymeleaf

Databases: MySQL

Developer Tools: IntelliJ IDEA, MySQL Workbench

NON TECHNICAL SKILLS

Leadership: Co-Head of Theater Club (GOONJ), leading a team of 20 members to execute 10+ successful events annually.

Team Collaboration: NMIT Cricket Team

Hobbies: Cooking, Sports
