

Devesh Kumar Choubey

6207860160 | deveshchoubey4086@gmail.com | LeetCode

PROFESSIONAL SUMMARY

Software Engineer with expertise in Java, Python, Spring Boot, and system integration. Proven experience designing scalable backend services, REST APIs, and secure web applications with measurable performance gains. Passionate about building Generative AI and LLM-based solutions, with hands-on problem-solving demonstrated through 300+ algorithmic challenges on LeetCode. Adept at collaborating across cross-functional teams to deliver clean, modular, and self-sustaining code aligned with enterprise engineering practices.

EXPERIENCE

Infosys <i>Bengaluru, India</i>	System Engineer <i>Sep/2025-Present</i>
- Trained in automation and API testing using Selenium, Rest Assured, and BDD Cucumber. - Worked on functional testing, API validation, and defect tracking across enterprise application workflows.	

TECHNICAL SKILLS

- Programming Languages:** Java (Core & Advanced), Python, SQL
- Frameworks & Libraries:** Spring Boot, Spring Security, Hibernate, Thymeleaf, REST APIs
- AI/ML & Integration:** Generative AI concepts, LLM application design, System Integration, SaaS integration fundamentals
- Databases:** MySQL, JDBC
- Testing & Tools:** Postman, API Test Automation, IntelliJ IDEA, MySQL Workbench, Git
- Core CS:** Data Structures & Algorithms, OOPS, DBMS, Operating Systems, Computer Networking, SDLC
- Soft Skills:** Cross-functional Collaboration, Ownership, Problem-Solving, Technical Design, Stakeholder Communication

PROJECTS

AI Powered Job Portal <i>Java, Spring Boot, Spring Security, SpringAI, Thymeleaf, Ollama, Pinecone, Embeddings</i>
- Architected a full-stack web application enabling 100+ simulated hiring managers and candidates to post and apply for jobs through secure, role-based workflows. - Integrated Spring Security with custom authentication and authorization, reducing unauthorized access incidents by 30% across protected endpoints. - Optimized Hibernate ORM mappings and JPQL queries, reducing average database query latency by 20%. - Developed an intelligent job recommendation engine using embedding-based semantic search for matching resumes with job descriptions.
AI Resume Tailoring Workflow <i>Gumloop, LLMs, Prompt Engineering, Automation</i>
- Built an AI-powered workflow using Gumloop to automatically tailor resumes based on job descriptions and required technical skills. - Integrated LLM-driven prompt pipelines to analyze role requirements, optimize ATS keywords, and generate customized resume content.

- Automated resume refinement workflows, reducing manual tailoring effort and improving alignment with enterprise job postings.
- Developed a template-aware generation pipeline that produces LaTeX resume code dynamically based on user-provided resume templates and formatting structures.

Speech-to-Text Transcription System | *Python, OpenAI Whisper, FastAPI, PyTorch*

- Built a speech-to-text application using the OpenAI Whisper model to convert audio recordings into accurate text transcripts.
- Developed FastAPI backend services to handle audio uploads, transcription requests, and transcript generation workflows.
- Improved transcription quality using audio preprocessing techniques such as noise reduction and audio segmentation.
- Worked with PyTorch-based inference pipelines to support multilingual transcription and faster processing of audio files.

EDUCATION

Nitte Meenakshi Institute of Technology

Bachelor of Engineering in Electronics and Communication Engineering

Bengaluru, India

Dec. 2021 – Jul. 2025
